

CR-905 Utility Construction Update

July 31, 2019

Paving Continues

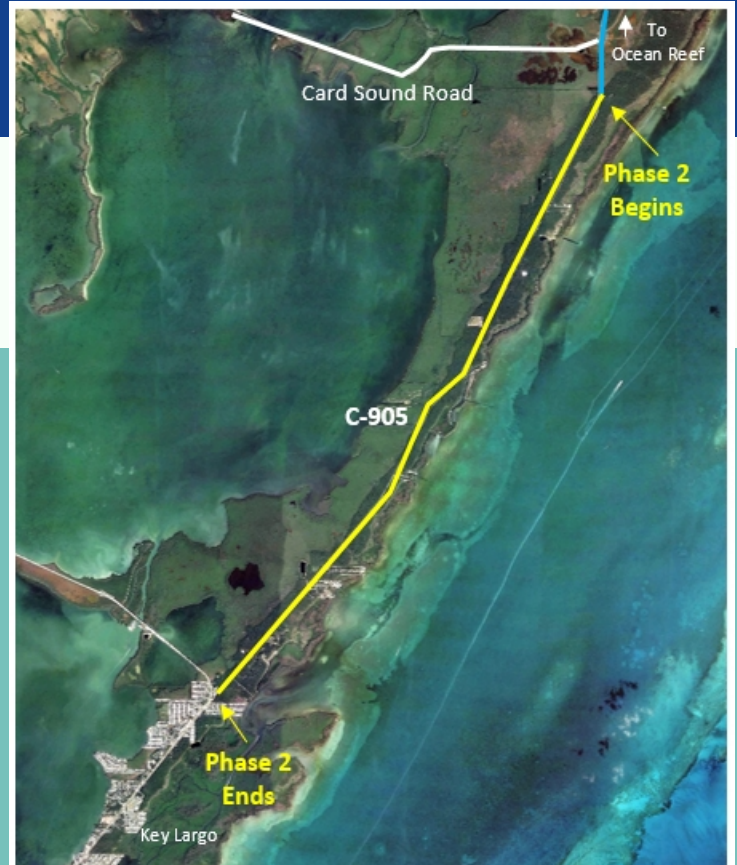

Weather permitting, paving is expected to be completed by Wednesday, August 14

Phase Two

Paving continues on Phase 2 of the CR-905. This area commences three miles south of the Ocean Reef Gate House and continues south to US 1. Paving is expected to be completed by Wednesday, August 14, weather permitting.

Phase Three

Phase three includes work on the remaining 600 feet of CR-905 and the utility crossing beneath US 1. The US 1 crossing will be completed utilizing directional boring technology, eliminating the need to cut across the roadway, reducing the impacts to traffic and existing surfaces. This work is expected to begin at the end of August and be completed in January 2020.
