

View My Meter

An invaluable resource in leak detection

March 16, 2018

View My Meter is an invaluable tool in assisting with leak detection in your home. While the service is not available Keys-wide just yet, the program currently covers about half of FCAA's accounts with new areas being added regularly.

You can now check your usage, trend your consumption and even make sure your meter is not running when you're not home.

Even better, **Automatic Alerts** will be sent to your email address if the data indicates a leak or unusually high consumption, allowing you to research any potential consumption issues.

Be sure your email address is on file with us.

Benefits!

- **See real-time meter readings**
- **Receive automatic alerts when data indicates a continuous flow**
- **View consumption in approximately 15 minute increments (conditions permitting)**
- **Identify patterns and atypical usage**
- **Manage and conserve water usage**
